Re: 310 CMR 7.02(11) 50% Facility Emission Cap Notification and
Recision of Restricted Emission Status (RES) Approval No. 4R94140

Dear Mr. Albert:

On December 18, 2012, the Department of Environmental Protection, Bureau of Waste Prevention, Southeast Region ("MassDEP") received a BWP AQ Emissions Notification Form requesting a 50% emission cap for your facility. Enclosed for your files is a copy of the form as processed by the MassDEP. The MassDEP hereby approves the 50% emission cap, which means that the facility's potential emissions will be limited to the levels established at 310 CMR 7.02(11)(e).

As submitted on December 18, 2012, you requested an emissions cap of 50% of all applicable emission thresholds as defined in the following Table.

Annual Pollutant Emission Limitations ⁽¹⁾						
Tons per consecutive 12-month period						
VOC	NO _x	SO _x	CO	PM ₁₀	HAPS	
					Single	Total
25	25	50	50	50	5	12.5

Note (1) - As stipulated in 310 CMR 7.02(11)(e)

Compliance with this facility-wide emission cap defers your facility's future applicability to any otherwise applicable major source requirements (e.g. the requirement to obtain an operating permit pursuant to 310 CMR 7.00: Appendix C).

In accordance with 310 CMR 7.02(11)(a)1., your facility is no longer subject to the restrictions established in Final Restricted Emission Status Approval No. 4R94140 granted pursuant to 310 CMR 7.02(9) and that Approval is rescinded.

As stated at 310 CMR 7.02(11)(b), operation under this facility-wide emission cap does not relax or eliminate any emission limitations or recordkeeping requirements established by regulation or by previously issued source-specific plan approvals or emission control plans. In addition, it does not eliminate the preconstruction plan approval requirements of 310 CMR 7.02.

The regulations at 310 CMR 7.02(11) contain specific recordkeeping and reporting requirements for an owner or operator who accepts an emission cap. Compliance with these requirements is an integral part of maintaining compliance with the emission cap.

If you have any questions, please contact Peter Russell of the Southeast Regional Office at (508) 946-2821.

Sincerely,

This final document copy is being provided to you electronically by the
Department of Environmental Protection. A signed copy of this document
is on file at the DEP office listed on the letterhead.

Thomas Cushing, Chief
Permit Section
